— BRAND IDENTITY SYSTEM

Brand Guidelines

A complete reference for how Reveal AI looks, sounds, and presents itself across every touchpoint — digital, print, and beyond.

01 — PHILOSOPHY

Our Identity

CLARITY**Radically Simple**

Voice AI is inherently complex. Our brand cuts through that complexity — every design decision should make things feel easier, not more impressive.

INTELLIGENCE**Quietly Powerful**

We don't shout about what we can do. The product speaks for itself. Our visual language is confident and restrained — not flashy or loud.

TRUST**Enterprise Ready**

Clean white space, precise typography, and consistent structure signal reliability. Businesses trust tools that look like they were built with care.

HUMAN**Warmly Technical**

AI can feel cold. We balance technical precision with approachable design — sharp enough for developers, friendly enough for everyone else.

BRAND VOICE**"Precise. Calm. Effortlessly capable."**

We write like a sharp colleague who knows their craft well. Direct without being blunt. Helpful without being patronizing. We never use jargon to impress — only to inform.

02 — LOGO

Logo System

PRIMARY — LIGHT BACKGROUND

REVERSE — DARK BACKGROUND

ICON ONLY

Favicon, app icon, social avatar

— CLEARSPACE RULE

Minimum clearspace = height of the icon on all sides. Never crowd the logo.

MINIMUM SIZE

24px

16px min

Never use below 16px. At small sizes, use icon only — not the full lockup.

✓ Use the primary version on white or light grey backgrounds.

✓ Use the reverse (white) version on dark or coloured backgrounds.

✓ Maintain minimum clearspace equal to the icon height on all sides.

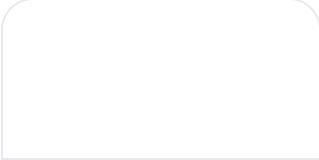

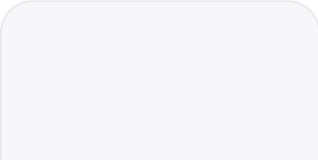

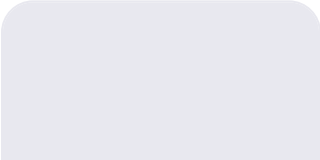

✗ Never stretch, rotate, or distort the logo in any way.

✗ Never recreate the logo manually — always use approved files.

✗ Never use the legacy brown/beige version of the logo.

03 — COLOR

Color Palette

 Blue — Primary #2563EB CTAs, links, active states, key UI accents	 Sky — Secondary #0EA5E9 Gradient end, highlights, progress indicators	 Ink — Dark #111118 Headlines, body text, dark UI surfaces	 White #FFFFFF Primary background, card surfaces
 Off-White #F7F7F9 Page backgrounds, secondary surfaces	 Border #E8E8EF Dividers, borders, outlines	 Muted #8A8A9A Secondary text, labels, placeholders	 Red — Error #EF4444 Error states, destructive actions only

PRIMARY GRADIENT
Blue → Sky
Direction: 135°
From: **#2563EB** → To: **#0EA5E9**
Use for: primary buttons, waveform bars, progress rings, highlight accents.
Never use on body text. Avoid on backgrounds larger than a component.

04 — TYPOGRAPHY

Type System

Aa

Inter — Primary Typeface

Weights: 300 Light · 400 Regular · 500 Medium
600 SemiBold · 700 Bold · 800 ExtraBold
Use for: all UI text, headings, body copy, labels
fonts.google.com/specimen/Inter

DISPLAY	56px · 800 · -0.04em	Reveal AI

Transcription accuracy across 30+ languages. Measured on real-world enterprise call data.

06 — ICON & SPACING

App Icon & Spacing

APP ICON SIZES

SPACING SCALE

TOKEN	VALUE	VISUAL	COMMON USE
space-1	4px		Icon gaps, tight padding
space-2	8px		Badge padding, inline elements
space-3	12px		Input padding, compact cards
space-4	16px		Card padding, list item gaps
space-6	24px		Section gaps, card margins
space-8	32px		Section padding, large gaps
space-12	48px		Page sections, hero gaps
space-16	64px		Hero padding, top-level layout

Base unit: 4px. All spacing values are multiples of 4. Border radius: 6px (badges) · 8px (buttons, inputs) · 10–12px (cards) · 16px (modals). Never use arbitrary spacing values outside this scale.
